Palm Springs, California to Host 43rd GRC Annual Meeting & Expo in 2019

More than 1,000 attendees from around the world are expected at the largest annual meeting of the global geothermal energy community

Davis, CA, USA - The Geothermal Resources Council (GRC) has announced the venue for the next GRC Annual Meeting & Expo. The 43rd edition of the geothermal energy event will be held in Palm Springs, California, USA, from September 15-18.

Come and help the geothermal community speak with one global voice. In addition to the high-quality presentations of the Technical Sessions there will be workshops, fieldtrips, an expo and numerous networking opportunities.

Palm Springs has a new dynamic downtown with stylish hotels, new fashionable restaurants, new chic shops and boutiques, new fun entertainment venues as well as welcoming public spaces for gathering, celebrating and relaxing.

With 360 days of sun-kissed weather and gorgeous scenery, Palm Springs is like no place else and experiencing a comeback as Hollywood's playground with a growing nightlife, burgeoning art scene and edgy vibe.

The surrounding area is a natural paradise with mountains and box canyons just outside of town and the Joshua Tree National Park just 12 miles away. Farther afield the cities of Los Angeles and San Diego are only two hours from Palm Springs.

The GRC Annual Meeting & Expo will be held in the Palm Springs Convention Center and the contracted hotels are either connected to the convention center or just a short walk away.

We will announce the opening of discounted hotel room reservations shortly and information on the Call for Papers will be made available before the end of the year.
